

Bhoomii India Packwell Pvt. Ltd.

Applications

Used to secure and lock composite straps by creating a tight grip during tensioning.

Suitable for manual strapping operations in various industries – logistics, warehousing, construction, timber, and steel.

Offers a non-slip joint that can hold high loads.

Specifications

Parameter	Specification
Material:	Galvanized High Tensile Steel Wire.
Sizes:	Matches strap width – 13 mm, 16 mm, 19 mm, 25 mm, 32 mm.
Finish:	Zinc or galvanized coating for corrosion resistance.
Type:	Phosphated or uncoated options also available.
Design:	Rounded or angled edges for strong grip without strap damage.

Advantages

- Provides high joint strength with minimal slip.
- Rust-resistant coating ensures durability.
- Allows for easy re-tensioning if strap loosens.
- Cost-effective and reusable.
- No need for seals or metal clips – simplifies operation.
- Suitable for heavy load applications.
