

Bhoomii India Packwell Pvt. Ltd.

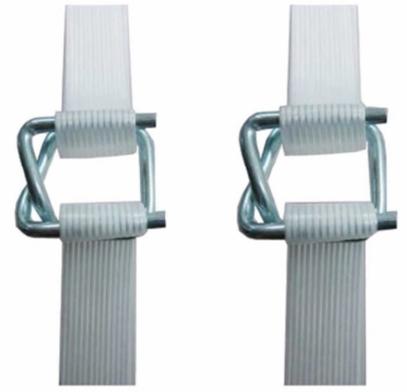

Applications

Used for heavy-duty packaging and cargo securing.

Ideal for palletizing, bundling, and unitizing products in industries like steel, construction materials, timber, logistics, and exports.

Suitable for outdoor storage and long-distance transportation.

Replaces traditional steel strapping in many use cases.

Specifications

Parameter

Specification

Material:	High Tenacity Polyester Filaments coated with Polymer (usually polypropylene).
Width:	16 mm, 19 mm, 25 mm, 32 mm (varies based on load requirement).
Breaking Strength:	Ranges from 400 kg to 1800 kg depending on width and quality.
Elongation:	8% to 12% (approx.)
	Weather-resistant and UV-stabilized variants available.
	Supplied in rolls (lengths like 500 m/roll or custom as needed).

Advantages

- **Stronger than plastic strapping** and safer than steel strapping.
- **Shock absorbent** – maintains tension during transportation.
- **Rust-proof** and **weather-resistant** – ideal for export and outdoor use.
- Lightweight and **easy to handle** – no sharp edges.
- **Does not damage goods** – gentle on surfaces.
- **Reusable** in many applications.
- Compatible with **manual strapping tools**.
