

Bhoomii India Packwell Pvt. Ltd.

Foldable Large Container (FLC)

Applications

1. Automobile Industry

For storing and transporting large or bulky auto components, like dashboards, bumpers, trims.

2. Engineering Goods

Ideal for moving precision machined parts, castings, or heavy metal components.

3. Textile & Garment Industry

Used for transporting bulk fabric rolls, finished garments, or accessories in return logistics.

4. Food & Agriculture

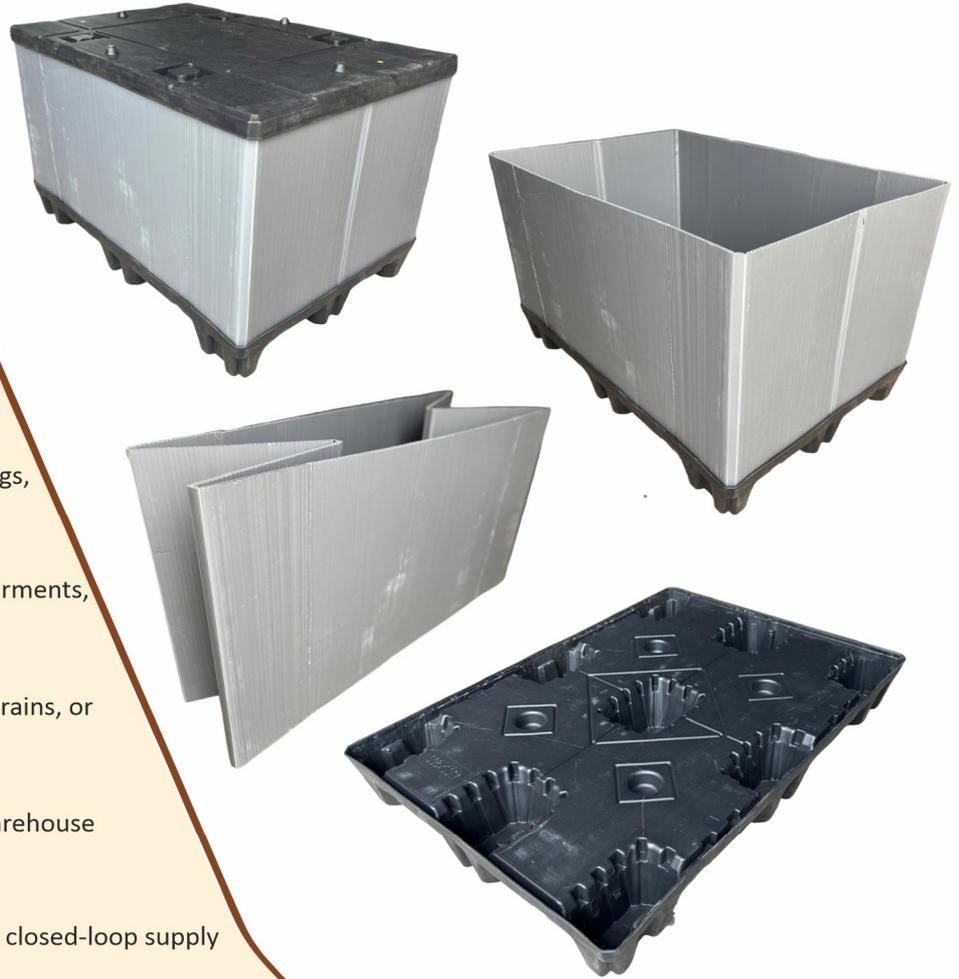

Suitable for storing and shipping fresh produce, grains, or packaged goods in dry or clean environments.

5. E-commerce & Retail Distribution

For managing reverse logistics and centralized warehouse movement of goods.

6. Pharmaceutical and Chemical Sectors

Safe for non-reactive solid containers used in dry, closed-loop supply systems.

Specifications

Parameter

Specification
