

Bhoomii India Packwell Pvt. Ltd.

Pneumatic Strapping Machine

Applications

- 1. Heavy-duty Packaging Lines**
for securing goods on pallets
- 2. Logistics & Warehousing**
fast strapping in high-volume areas
- 3. Metal & Steel Industry**
bundling pipes, rods, or coils
- 4. Construction Materials**
strapping bricks, tiles, cement bags
- 5. Wooden Products**
pallets, timber, plywood sheets
- 6. Export Packing**
container shipments of machinery or parts
- 7. Automotive Industry**
securing assemblies, crates, and spare parts

Specifications

Parameter	Specification
Model:	AQD 19
Strap Type:	PET / PP Strapping
Strap Width:	13 mm – 19 mm
Strap Thickness:	0.5 mm – 1.2 mm
Tool Weight:	Approx. 3.8 – 4.0 kg
Tension Range:	2400 N (adjustable)
Air Pressure Required:	6 – 7 Bar (approx. 85 – 100 PSI)
Sealing Type:	Friction Weld Sealing (No seal required)
Body Material:	High-strength alloy body
Operation:	Manual handling, Pneumatic driven

Advantages

- **High Tension Power** - ideal for heavy-duty and industrial loads.
- **Friction Weld Seal** - strong, reliable, and eliminates metal seals
- **Fast Operation** - efficient strapping in seconds
- **Ergonomic Design** - compact, lightweight, and easy to operate
- **Low Maintenance** - robust build with minimal service requirements
- **Consistent Performance** - pneumatic power gives uniform tension
- **Cost Saving** - no seal cost, reduced strapping material waste
- **Versatile Use** - compatible with both PP and PET straps
